

Monstruoznost zločinaca je vidljiva i na ostatcima tijela koja obrađuju forenzičari. Na osnovu tragova o načinu egzekucija i drugih detalja mogu se izvoditi zaključci o brutalnosti koljača i ubica. Bestijalnosti nisu bile pošteđene ni žene, ni djeca, čak ni trudnice.

Cruelty of criminals is also visible from the remains of the bodies processed by the forensics. On basis of the traces on ways of executions and other details, conclusions on brutality of culprits and murders can be made. Women, children, even pregnant women were not exempted from this cruelty.
